La Maison Du Smartphone

La Maison du Smartphone

# Réalisé par Allan BIVILLE & Zachary Huguet

TABLES DE MATIERES

➤ 1 - Description

La Maison Du Smartphone is an online website software, a PHP web application developed using the Symfony framework (version 5.4.2).

Its purpose is to show an image of the store, informing customers of certain new products, to offer a simple and practical quotation system, to contact the store, and to see the products for sale by the store.
